

hello world

A screenshot of the Atom text editor showing a Laravel project. The left sidebar displays a file explorer with a tree view of the project structure, including folders like 'resources' and 'routes'. The main editor area shows the 'web.php' file with the following PHP code:

```
1 <?php
2
3 use Illuminate\Support\Facades\Route;
4
5 /*
6  * Web Routes
7  *
8  * Here is where you can register web routes for your application. These
9  * routes are loaded by the RouteServiceProvider within a group which
10  * contains the "web" middleware group. Now create something great!
11  */
12
13 Route::get('/', function () {
14     return view('welcome');
15 });
16
17 Route::get('/hello', function () {
18     return 'hello world';
19 });
20
21 Route::get('/user', 'UserController@index');
```

The status bar at the bottom indicates the file is 'routes/web.php' at line 243.A screenshot of the Atom text editor showing the 'UserController.php' file in the same Laravel project. The left sidebar shows the file explorer with 'UserController.php' selected under the 'controllers' folder. The main editor area shows the following PHP code:

```
1 <?php
2
3 namespace App\Http\Controllers;
4
5 use Illuminate\Http\Request;
6
7 class UserController extends Controller
8 {
9     public function index()
10     {
11         return 'hello world';
12     }
13 }
14
```

The status bar at the bottom indicates the file is 'app/Http/Controllers/UserController.php' at line 1126.
